# IRIS CHEMICALS

*Together We Can Achieve !*

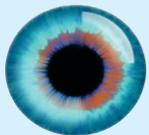

**Iris Chemicals** has established a state of art chemical processing unit, with a strong research and development Centre based in Tal. Daund, Pune. Iris chemicals -agriculture division, was established, with an aim to provide the Indian farmer with the latest next-gen agricultural technical inputs, for india to become the food production centre of the world. The age old agri-techniques need to be replaced with advanced practices that are efficient, sustainable repetitive, cost effective and environmentally friendly, to produce best quality and enhanced quantities of agricultural produce at affordable cost.

The advanced plant fertigation technological products in the form of **liquid** primary, secondary and micro nutrients, along with active carbon technology based soil activators have been researched, developed, manufactured and presented to the farmers under the brand "**SWARAAJ**".

**All the products have the following characteristics ( F.C.O. approved ):**

- **All are liquid fertilizer with low salt index.**
- **Each formulation of liquid NPK have been enriched with specific micro nutrients, that are required at the specific plant growth stage.**
- **They are required much smaller quantities,**
- **Nitrogen is delivered as an eutatic- solution of Urea ammonium nitrate with all three nitrogen types**
- **Phosphorous is delivered in it's superior, slow release, concentrated polyphosphoric form with deep soil penetration.**
- **Potassium is delivered as an organic carboxyl derivate form, for very fast uptake by the roots.**
- **Calcium, the slow mover is delivered as nitrate and carboxylate forms for fast calcium translocation into the plant system. All micro nutrients are in the Carboxylate form for total and efficient utilization hence no wastage.**

**Iris Chemicals, SWARAAJ** product range basket encompasses all the requirements that the plants wants from the seed stage, it's vegetative growth stage to it's flowering and harvesting stage. it has various primary NPK formulations plus secondary nutrients plus all the micro nutrients required for ideal plant growth. The various options are available as elucidated in the product range herein.
